**Cadastral Oral Fluid Quick Reference Guide**

OraQuick® Ebola Rapid Antigen Test

*For Use Under Emergency Use Authorization (EUA) Only*

### Step 1a. – Specimen Collection

**Direct Specimen Collection**

For direct collection, swab the cadaver using the flat pad of the device. If direct collection from the soft palate is not possible due to rigor mortis, collect sample from the gum line.

1. **Collect sample from the soft palate (back of the oral cavity) using the flat pad of the device.**
2. **Collect sample from gum line.**

#### OR

**Viral Transport Media**

For specimen collection in viral transport media follow instruction of the Swab/Transport media manufacturer. Prior to testing, mix the transport media tube gently by inversion several times. Store at 2°-25°C (36°-77°F) for transport. If sample cannot be tested within 48 hours of collection, store specimen at -70°C (-94°F).

1. **Slowly fill the micropipette.**
2. **Place the tip of the micropipette in the vial transport media tube and slowly draw the sample up.**
3. **Rinse the pipette to avoid cross contamination.**
4. **Never squeeze the micropipette while sampling.**

### Step 2. Perform the Test

Insert device into vial

Start timer

Purple fluid travels through the Result Window

**DO NOT** remove the device from the developer vial while the test is running.

### Step 3. Read Results

**Positive results** may be interpreted as soon as lines are visible in the Test (T) zone and the Control (C) zone.

**Negative: Line in C Zone**

- No Ebola Antigens detected
- The test result is interpreted as Ebola Antigen was not detected. The cadaver is Negative for Ebola Antigen.

**Invalid: Repeat with a Fresh Sample**

- No line in C Zone
- Purple background obscures results
- Any partial line at C or T Zone

**Positive: Lines in C and T Zones**

- A Positive test result is interpreted as Ebola Antigen detected in the specimen. The cadaver is positive for Ebola Antigen.
- Individuals with a positive result with the OraQuick® Ebola Rapid Antigen Test should, in accordance with CDC and WHO recommendations, be subjected to safe and dignified burial procedure. Contacts of an Ebola positive cadaver should be identified and followed up.

### Order Information and Description

- **1001-0425** Kit Controls
- **1001-0426** Box of 25 tests
- **1001-0427** Box of 100 tests
- **1001-0428** Visual Reference Panel

Please refer to the package insert for complete information and instructions on the proper use of the OraQuick® Ebola Rapid Antigen Test.
