Di OraQuick® HIV Self-Test is a medical instrument to be used in vitro diagnostic (IVD) device to detect HIV-1 and HIV-2 by using a home-use test strip. For the first 3 months after exposure, it can be used to detect HIV-1 and 2 months after exposure, it can be used to detect HIV-2.

**How to use the test?**

1. **Open the kit.**
   - Place the test in a cool, dry place where it will not be exposed to direct sunlight.

2. **Prepare the test.**
   - Make sure you are using the correct test strip.

3. **Begin the test.**
   - For the first 3 months after exposure, it can be used to detect HIV-1 and 2 months after exposure, it can be used to detect HIV-2.

4. **Interpret the results.**
   - If you get the HIV-1 or HIV-2 result, you should contact your healthcare provider.

**What does the test show?**

- **Positive result:**
  - Two lines will appear (one line near the "T" and one line near the "C"). This means that the test is positive.

- **Negative result:**
  - No lines will appear. This means that the test is negative.

**Important information:**

- **If you have a positive test result:**
  - Contact your healthcare provider immediately.
  - Make sure to follow up with your healthcare provider regularly.

- **If you have a negative test result:**
  - Continue to follow your healthcare provider's advice.

**Warning and Precautions:**

- Do not use this test if:
  - You are under 11 years old.
  - You are pregnant.
  - You are breastfeeding.
  - You are lactating.

**Test Information:**

- **Validity:**
  - The test is valid for 12 months from the production date.

- **Storage:**
  - Keep the test kit in its original packaging.

**Handling and Precautions:**

- **Store the test kit at room temperature.**

**What does the product contain?**

- **Test kit:**
  - 1 test strip
  - 1 instruction booklet

**Additional Information:**

- **FDA-cleared HIV-1 and HIV-2 test.**

**FAQs:**

- **Can I use this test if I am pregnant or breastfeeding?**
  - Yes, you can use this test if you are pregnant or breastfeeding.

- **Can I use this test if I am elderly?**
  - Yes, you can use this test if you are elderly.

**How many times should I test for HIV?**

- **Once a year:**
  - If you have a negative result on your first test, you should test again in 12 months to ensure that you are negative.

**Where can I get tested?**

- **Healthcare provider:**
  - Your healthcare provider can test for HIV.

- **HIV self-test provider:**
  - Many hospitals and clinics offer HIV self-tests.

**How to get the test?**

- **Online:**
  - Order the test kit online and have it shipped to your home.

- **In person:**
  - Visit a healthcare provider or a testing center.

**What is the time frame for results?**

- **Positive result:**
  - Immediate

- **Negative result:**
  - Within 15 minutes

**What if I get a positive result?**

- **Contact your healthcare provider immediately.**

**What if I get a negative result?**

- **Continue to follow your healthcare provider's advice.**
